

AI Smart Grid Monitoring Report

This report presents electricity consumption trends over a 10-year period. It highlights seasonal patterns and identifies peak demand months. Results show that electricity consumption is highest during summer due to increased cooling demand.

Year	Month	Season	Total Consumption (MW)	Rank (Yearly)	% Change	Remark
2008	July	Summer ■	29,230,849	1	10.63	■ Peak Month
2008	June	Summer ■	26,421,539	2	24.06	Normal
2008	August	Summer ■	26,096,686	3	-10.72	Normal
2008	January	Winter ❄■	25,751,328	4	0.0	Normal
2008	December	Winter ❄■	25,091,809	5	13.26	Normal
